Complete Store Water Quality Systems with Two Outlets

Model EQHP-TWIN 108SP
Water Quality System

Features

108,000 Gallon Water Quality System

Two outlet water filtration and scale-inhibition system for high flow-rate and capacity environments

- Two separate streams, both with reduced sediment and chlorine taste and odor, exit the manifold. One stream has scale-inhibition media added from a dedicated cartridge to reduce the ability of lime scale to precipitate. The other stream supplies cold beverage dispensers and has no added scale inhibitor.
- System includes a two-cartridge manifold with built-in pressure gauge, inlet water shut off valve, outlet check valve, mounting brackets, two cartridge filters and a dedicated external scale-inhibition cartridge.
- Consistent great-tasting beverages and ice from water with reduced sediment and chlorine taste and odor.
- Incorporates multi-zone pharmaceutical grade pleated nylon pre-filter.
- Pre-filter offers exceptional sediment holding capacity and particle reduction to 0.2 microns.
- NSF Standard 42 and/or FDA CFR-21 compliance provides assurance of safety.
- EQHP-54 cartridge certified by NSF to Standard 53 for cyst reduction.
- Reduced scale formation by the controlled release of proprietary scale inhibitors as tested by the manufacturer.
- Quick Connect Head uses encapsulated cartridge design allowing for fast and easy change-outs with a 1/4 turn while minimizing the possibility of leakage and contamination.
- Auxiliary inlet gauge port allows optional monitoring of differential water pressure.
- Filter cartridges incorporate carbon block media and require no pre-activiation.
- 108,000 gallon capacity based on system's chlorine reduction rating.

Dimensions & Specifications

Model	Product #	Service Flow Rate & Capacity	Micron Rating	Application
High Volume				
39000.0013	EQHP-TWIN180SP	10 gpm/ 108,000 Gallons	0.2	Complete store system needing 108,000 gallon usage per 6 months.

Note: Inlet and outlet plumbing connections are 3/4" NPT.
System maximum operating pressure is 125 psi (862 kPa) and operating temperature 100˚F (38˚C).

BUNN® practices continuous product research and improvement. We reserve the right to change specifications and product design without notice. Such revisions do not entitle the buyer to corresponding changes, improvements, additions or replacements for previously purchased equipment.
