BUNN®
BREW BETTER, NOT BITTER®

Phase Brew®

BUNN Phase Brew heats and hold water until it reaches the perfect brewing temperature—only then is the water spray-released, not slow-dripped over coffee ground to achieve ideal flavor extraction. This innovative Heat and Release technology results in a perfect pot of coffee with richer flavor and amazing aroma.

Phase Brew® HG

- 6-minute heating phase + 4-minute brewing phase = 10-minute to better coffee
- Programmable Auto-Start
- Warmer automatically shuts-off after 2 hours
- Cleaning indicator
- Brews 8-cups (40 oz.) at a time
- Glass carafe
- Specialty Coffee Association of America Certified

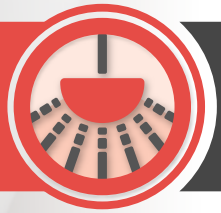

Phase Brew® HT

- 6-minute heating phase + 4-minute brewing phase = 10-minute to better coffee
- Programmable Auto-Start
- Cleaning indicator
- Brews 8-cups (40 oz.) at a time
- Thermal carafe
- Specialty Coffee Association of America Certified
- 2011 GOOD DESIGN™ Award

WHY BUNN BREWS BETTER

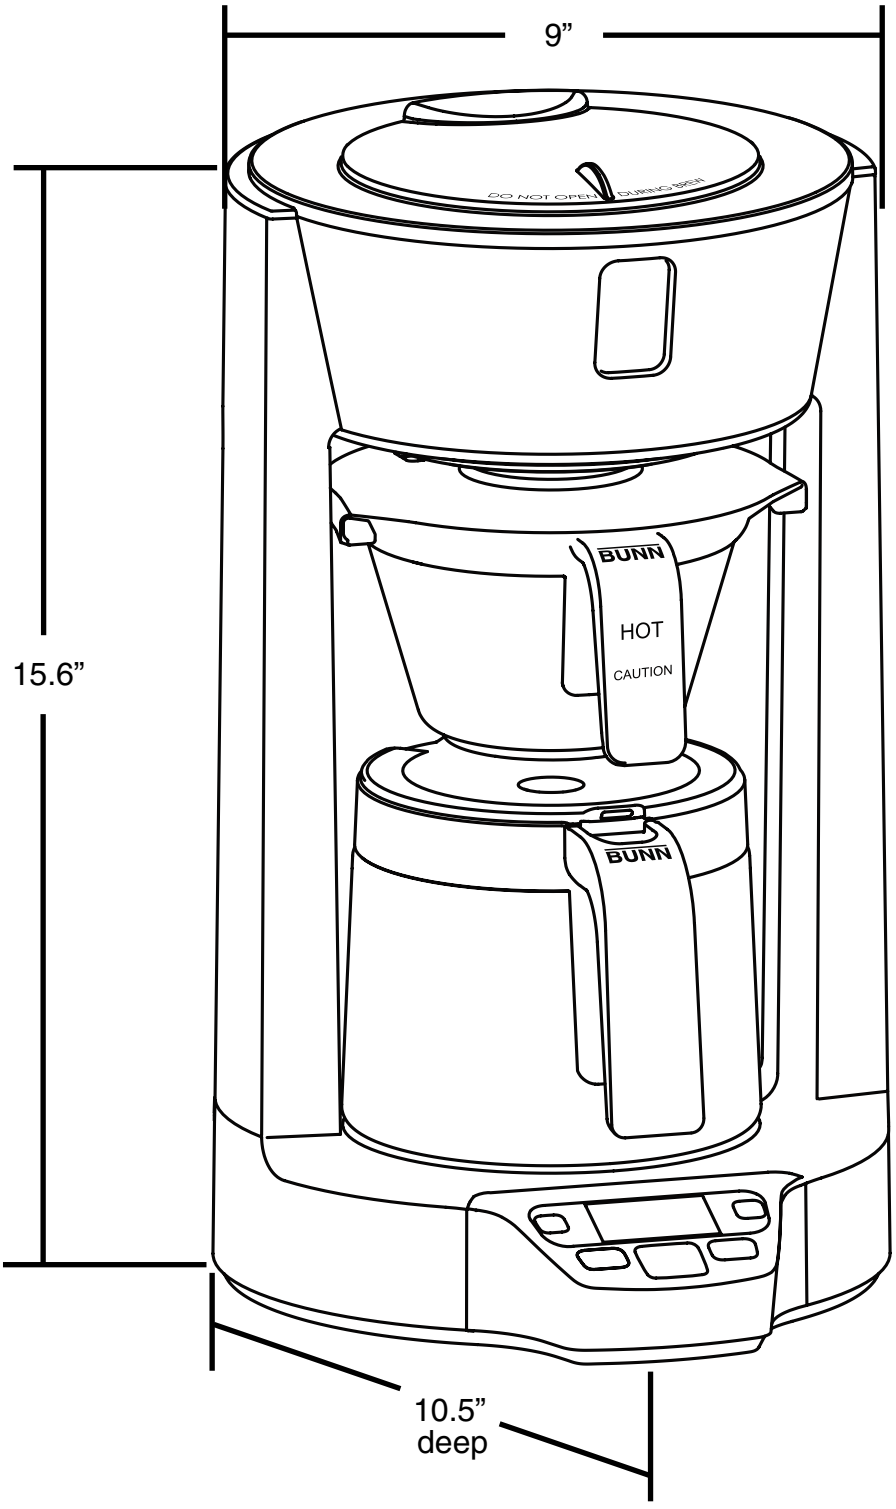

BUNN® PHASE BREW®	VS.	TYPICAL DRIP
5-minute heating phase heats water to about 200°F, the right temperature for hot, flavorful coffee that's never bitter.		Brews at an inconsistent temperature. If water's too cold, flavor can get left behind. If water's too hot, coffee can taste bitter.
Water in the top tank is released through our patented sprayhead – creating the turbulence needed to wet the grounds evenly and extract perfect flavor.		Drips water slowly over grounds, so there's not enough turbulence to wet all the grounds evenly. Some grounds are over-extracted, making coffee taste bitter.
3-minute brewing phase, the right time for rich, smooth coffee that's never bitter.		Heats water during the brew cycle, dripping it slowly onto grounds. The longer brew cycle makes coffee taste bitter.

It's our mission to help you brew, and enjoy, your best cup.

BUNN® *Dimensions & Specifications*

Model	Volts	Amps	Total Watts	Brewing Capacity	Shipping Weight	Agency
PHASE BREW HG	120	10.83	1300	40 oz. (8 cups)	9.4 lbs. (4.3 kg)	UL LISTED NSF

Electrical: Model has attached 3-prong grounded cordset and requires 2-wire grounded service rated 120V AC, single phase, 60 Hz.

BUNN® practices continuous product research and improvement. We reserve the right to change specifications and product design without notice. Such revisions do not entitle the buyer to corresponding changes, improvements, additions or replacements for previously purchased equipment.
