

Cretors (Giles) Ventless Hood

- Baffle Filter (First Stage):
 - Removes larger grease particles.
 - Clean on an every other night basis.
- Electrostatic Filter (Second Stage):
 - Removes (zaps) smaller grease particles.
 - Clean on a nightly basis (a second filter and cleaning tank are included to provide for easy daily rotation)
 - Use a Simple Green solution for cleaning.
- Disposable Filter (Third Stage):
 - Catches any remaining grease particles
 - Replace with new filter every 2-3 months.

Part Number	Voltage	Wattage	Amps
14476	208v; 230v	433	2
