SAFETY PRECAUTIONS

Paragon values your continued safety above all else. Please follow these guidelines when using your equipment to prevent injury and maximize product performance:

No direct contact to equipment by the general public should be allowed when used in food service locations. Only trained personnel should operate this equipment. Carefully read any and all instructions before beginning operation of the equipment.

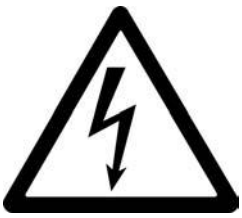

Always wear safety glasses when servicing equipment.

Shaver reaches high speeds during operation. To avoid injury, NEVER place body parts or objects such as ice picks into or near the shaver head assembly while motor is running. *Paragon is not responsible for any injuries that may occur due to failure to follow safety precautions.*

Any alterations made to equipment by anyone other than certified Paragon personnel will void warranty and may also create unsafe working conditions. NEVER make alterations to the equipment.

Machine must be properly grounded to prevent electrical shock.
Do NOT immerse any other part of this equipment in water. Doing so may damage equipment and prevent it from working properly.
Always unplug equipment before cleaning or servicing to prevent electric shock.

INTRODUCTION

PARAGON IS PROUD TO BE YOUR
PARTNER FOR MANUFACTUREDFUN.

Our goal is to provide you with the best solutions to attract customers, expand your business, and improve your profits. That's why this product has been specially-crafted to meet precise specifications for performance, efficiency, and output.

Your Paragon Sno-Cone Machine features:

- Sturdy, cast-aluminum components and stainless steel blades that are adjustable and easy to replace.
- Heavy-duty, 220 watt motor with 1725 rpm, featuring a convenient manual safety reset to prevent accidental start-up in the case of a jam.
- Slanted pan deck is removable. Made of food grade plastic, engineered to drain water away from the machine through the attachable hose supplied with the machine. Always use the drain pan extended out to capture moisture during operation with the hose installed.
- Stainless steel and aluminum construction of internal shaving components and a sturdy plastic injection body.

Should you have any questions about your equipment, or would like to know more about our other innovative concession equipment and supplies, please contact us at 1-800-433-0333.

Thank you for your purchase and enjoy!

ELECTRICAL REQUIREMENTS

This product requires a properly-grounded 120 volt supply with a 15 amp circuit. The Yeti has a current draw of 1.7 amps.

We recommend your Paragon Yeti Ice Shaver be plugged directly into a dedicated outlet. Extension cords may create a safety hazard and reduce its performance.

Be sure outlet accepts three (3) prong grounded plug. DO NOT use a three (3) prong to two (2) prong adapter.

UNPACKING

Paragon ensures each product is inspected during assembly and after completion to adhere to strict quality guidelines, and packs it securely to ensure safe delivery to each of our customers. Be sure to carefully remove all packing material and adhesive before any operation. Please examine your product to guarantee all equipment has arrived, complete and in good condition.

If you believe that any damage may have occurred during shipment or parts may be missing, please contact Paragon immediately for replacement.

FREQUENTLY ASKED QUESTIONS

How much will my Yeti ice shaver machine produce?

Your ice shaver machine was engineered to shave 360 lbs. of cube or chunk ice per hour (6.0 lbs./minute). Based on the ratio that a 1/2 lb. of ice will make a 6 oz. sno-cone, the Paragon Sno-Cone Machine will yield 720 sno-cones per hour.

How much syrup should I use to flavor my sno-cones?

One 6 oz sno-cone will take 2 ounces of syrup – cones will not hold more than that.

Can I use block ice to make sno-cones?

You can use block ice to produce sno-cones if you first break the block down into pieces 3-4 inches in size. Ice will not fit the horn if the pieces are too large. For best results use 1” cubed ice in the hopper. The hopper capacity is 70 pieces of 1” cubed ice (1”x1”).

OPERATING INSTRUCTIONS

Be sure equipment is connected to properly grounded 120 volt power supply with 15 amp circuit.

Shaving Ice

1. Put desired amount of cubed ice into the top hopper and close the lid.
2. Turn blade adjustment knob counter clockwise until it comes to a stop
3. Turn on the power switch
4. Slowly turn the blade adjustment clockwise until desired ice consistency is reached.

Note: Motor starts only while the hopper lid is closed.

1. For safe operation, please observe these precautions:
2. Turn on switch after closing the lid
3. Add ice cubes only when the power switch is OFF and after the machine has completely stopped.
4. Ice cube level should not exceed a line approximately 1.25” below the top of the rotating hopper.
5. Load ice cubes evenly in hopper to avoid unnecessary vibration.
6. Do not use large blocks of ice.

Overload Protection

The unit automatically shuts off when the motor is overloaded. In this case, set the power switch to OFF and remove the cause of the shut down before replacing a new fuse.

Adjusting Ice Texture

For coarser ice shaving, turn the blade adjustment knob clockwise.
For finer ice shaving, turn the knob counter-clockwise.

BLADES ARE SHARP AND OPERATE AT HIGH SPEEDS!

Please be sure to keep all body parts and any objects such as picks or scoops away from and out of the hopper when POWER is on!

MAINTENANCE OF CUTTING HEAD

Oiling

Lubrication is not necessary on this unit.

Changing Blades

1. Disconnect power cord from socket.
2. Loosen the three (3) screws covering the blade housing and ice outlet chute.
3. Remove the two (2) screws holding the blade and take out the blade. Blade is razor sharp, use extreme caution!
4. Install new blade and tighten screws with hold the blade in place. Ensure that blade tip is parallel to the opening of the conical shaving case. Re-assemble parts in the reverse order of the above instructions.

Cleaning Procedures

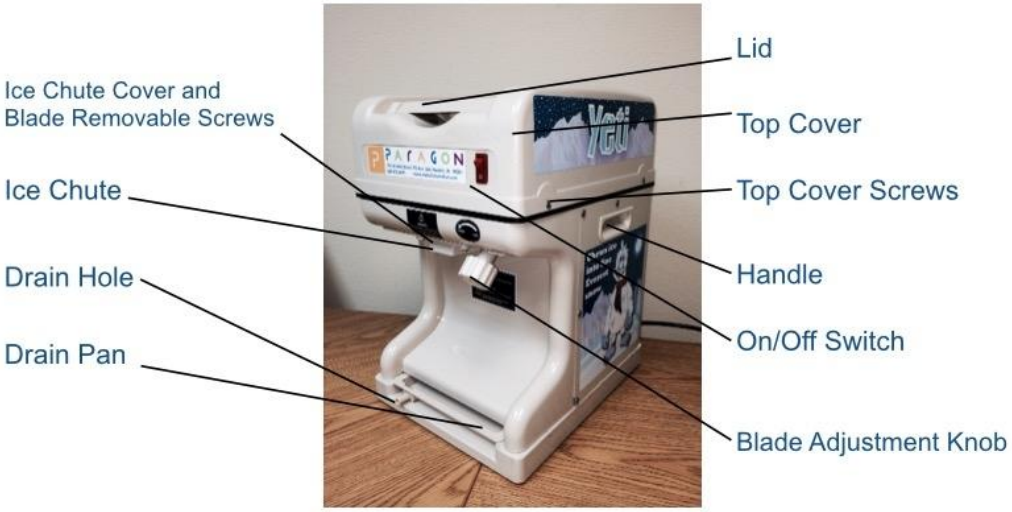

1. Disconnect power cord from the socket.
2. Loosen the four (4) headed screws along the top cover and remove. Be sure not to disconnect wires connecting the top casing to the body and motor wires.
3. Loosen and remove the three (3) screws which secure the clear plastic water-seal cover. Grip the clear-plastic water seal cover by its bottom edge and pull it out and up to remove.
4. Loosen and remove the three (3) screws which secure the inner clear plastic water seal cover. Grip the clear-plastic water seals cover by its bottom edge and pull it out and up to remove.
5. Unscrew and remove the large nut which attaches metal rotary wing to the shaving case. Lift metal rotary wing upward to remove.
6. Remove the three (3) screws which fasten the conical shaving case and lift upward to remove.
7. Remove the two (2) screws which attach shaver blade assembly, change blades.
8. Using a clean cloth, wipe down the following items.
    - The inner surface of the ice horn (Caution: Sharp Blades)
    - All interior and exterior surfaces
    - the water collection tray
    - Slip the drain hose off the nipple fitting
    - Lift the tray out of the cabinet
    - Use small amount of dishwasher soap and water to clean plastic exterior parts and aluminum components.
    - Do not use water on electrical parts
    - Do not wash any parts inside a dishwasher
9. Reassemble parts in reverse order.

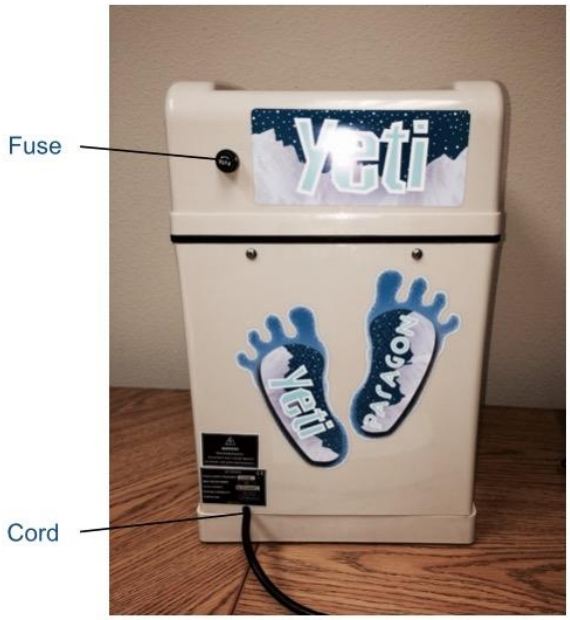

Note: FDA approved cleaners may be used when required for sanitation.

SPECIFICATIONS

Dimensions	11” W x 14” D x 17.5” H
Electrical	120V, 1 Phase, 60 Hz, 1.7A, 220W
Shaving Capacity	6.0 Lbs/ Min
Ice Hopper Capacity	70 Pieces of 1” cubed ice (1” x 1 “)
Weight	33 pounds

UNIT DIAGRAM

Thank you for choosing the Yeti Ice Shaver by Paragon International. Paragon International, Inc., hereinafter referred to as the COMPANY, warrants the original purchaser, new commercial concession machines manufactured by the COMPANY to be free from defects in material and workmanship under normal use and service from the date of original installation under the following one year warranty program.

COMPANY will repair or replace any defective part/s, excluding heat lamps, when failure is experienced. (FOB Nevada, Ia. USA)

The obligation of the COMPANY under this warranty is limited to the replacement of parts or assemblies that in the COMPANY's opinion are defective, F.O.B. the factory, or at such other location that the COMPANY may designate.

The foregoing warranty shall not apply to (1) any part or assembly that has been altered, changed, or modified; (2) water damage to components of the kettle assembly due to immersion or improper cleaning techniques; (3) any part or assembly that has been subject to abuse, neglect, misuse, or accidents; (4) damage to the components of the kettle assembly due to improper use of cooking oil; or (5) any machine that has been installed, operated and/or maintained inconsistent with the COMPANY's publications.

THE FOREGOING WARRANTY IS EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES WHETHER ORAL, WRITTEN, OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR PURPOSE. The liability of the COMPANY arising out of sale, use or operation of the COMPANY's parts or equipment, whether in warranty, contract, negligence or strict liability, including claims for special indirect or consequential damages, shall not in any event exceed the cost of furnishing a replacement for a defective part or assembly as hereinabove provided. Upon the expiration of the warranty period, as hereinabove provided, any such liability shall terminate. The foregoing warranty shall constitute the sole and exclusive liability of the COMPANY.

Within the terms of this warranty the term "Original Purchaser" is limited to the individual, company, or organization stated as the purchaser in warranty records of the COMPANY or an authorized reseller.

This warranty is only good for machines located in the US and Canada. Call manufacturer for questions regarding warranties in any other country.
