BLIZZARD

SNO-CONE MACHINE

Our standard concession stand model. This machine is for environments where speed and looks are both critical. The Blizzard features a full-enclosure cabinet design to offer the best appearance. A back-light is built in to complete the look. The exclusive blue-tinted polycarbonate panels provide additional protection from the sun, added safety, and a great look. 3-year warranty.

The Blizzard was designed for the concessionaire who needs fast production and high visibility.
If you want to make a statement, this is your machine. It is a beauty with the streamlined look. The fluorescent back-light guarantees high visibility. You get a 500 lb/hr production capacity combined with a large cabinet with dual access doors. A cup dispenser is included! The stainless-steel blades are adjustable to effect the fineness of the crushed ice.

With Paragon sno-cone machines, you don't have to worry about which model has what motor or certifications.

We use the same heavy-duty motor on all models and every machine is ETL and NSF approved.

So you can make your choice based on functional needs and budget and not worry about quality.
