KOBALTO

by NECTA
A company of N&W Global Vending Group

The Kobalto features:

- Dual bean hoppers and grinders
- 7-12 gram automatic brewer with hydraulic tamping
- Automatic milk frothing (standard) or optional manual steam wand
- Dual voltage option—220v (20 amp) single phase or 110v (16 amp)
- 8-16 programmable buttons
- Dual/single soluble canisters for chocolate, French vanilla or chai tea
  120 Espressos /hr or 60 Cappuccinos/hr

Necta, a leading trademark well-known and appreciated all over the world, has used all its technical expertise and years of beverage experience to develop the Kobalto. It is available in two versions and can offer a combination of technologies: bean to cup, espresso, manual or automatic milk steaming as well as a wide range of ingredients such as fresh beans, soluble powders like chocolate or vanilla. Due to its flexibility and wide product range, the Kobalto is ideally suited to meet all the requirements of the Foodservice market. Modern Italian styling, combined with compact size and simple user interface make it a wide-ranging machine with broad appeal that can be easily positioned in any location.
