

Zumex®

On-Site **Natural Benefits**

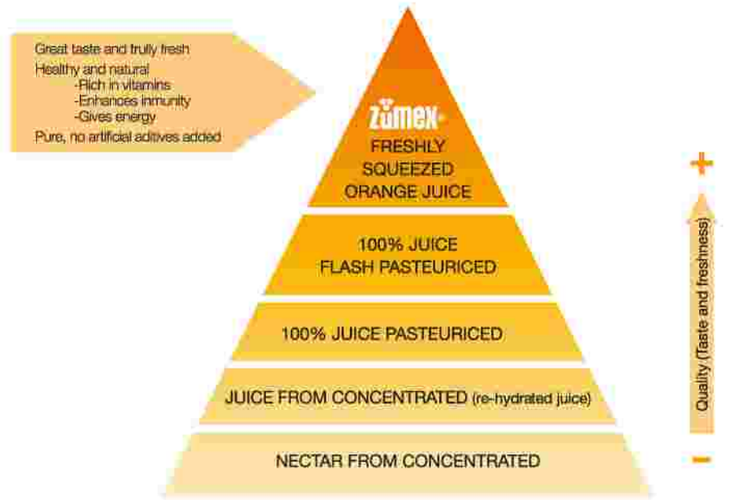

General Catalogue

Drinking fruit juice is drinking health

Consumers know this, and they therefore appreciate more and more how healthy it is to drink a good, fresh fruit juice. Anytime, anywhere.

Fruits in general and oranges, the queen of citrus fruits, in particular **are full of vitamins, minerals and antioxidants**. Their consumption prevents colds and heart diseases, helps the digestive system and delays cellular ageing.

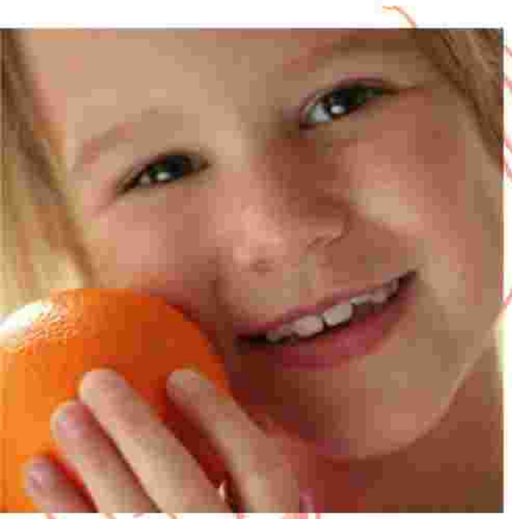

What could be better than having a freshly squeezed juice in front of you? That is the great service advantage that our clients can offer consumers with our products and squeezing system. It is certainly better than any alternative with packaged juice.

Who we are...

Zumex is the **Spanish world-leading company** in the transformation of all types of fruit into juice. It is a **pioneer** in the design, manufacture and distribution of juicers and blenders for the food service and retail markets.

Zumex is present **in more than 70 countries** through its distribution network and with branch offices in U.S.A. and Mexico, and is the undisputed leader in market share and international presence.

Our experience spans more than 20 years and means we can offer our clients a versatile range of solutions for juice-making. The wide variety of Zumex products ensures that the best option for each sale point is found. That is why we want to provide assistance. So that your service is the best and your clients can enjoy the freshest and most natural juice.

Furthermore, our **wide network of worldwide official distributors** allows us to offer the best **technical assistance service**.

Zumex®

On-Site Natural Benefits

At Zumex we analyse the **needs of all the agents** involved in the process of preparing a freshly-squeezed juice. Our vocation is to provide **overall solutions** to facilitate this:

- **Consumers** — We provide the assurance that the fruit juice is going to be prepared **in front of you**. No containers. No preservatives. Only fruit and our juicers.
- **Users** — Our products are **easy to handle and maintain**. And we are going to continue innovating to improve them even further.
- **Operators** — We provide all the assistance and support you need to transform the service of freshly-squeezed juice into a **profitable business**.

Furthermore, in order to make it easier to relate our range of products to the needs they cover we have decided to **update their identification**. It will now be **easier** to understand the main characteristics of each of them to **decide what Zumex juicer best suits your needs**.

Zumex all over the world

Zumex guarantees the best service worldwide through its **Official Distributor network.**

Zumex Foodservice

Every day, **consumers have breakfast, lunch or dinner outside their homes** more and more often and look for the same things as when they eat at home: **a healthy, natural and balanced diet**.

This need includes access to fresh products such as **fruit** and vegetables, bearing in mind the recommendations from all nutritionists and authorities about the need to have at least **five pieces** a day.

And what better way to enjoy fruit than with a freshly-squeezed juice? Our products and solutions allow **any type of business** to provide the best service to its consumers.

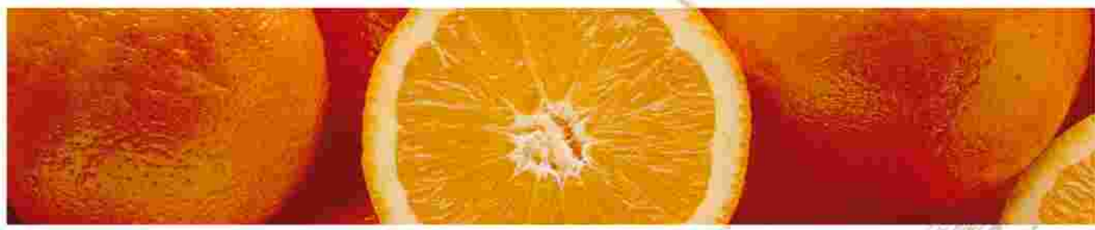

Zumex Versatile

RECOMMENDATIONS FOR YOUR BUSINESS

Below is a **basic guide of the best practices** to maximise the consumption and profit of freshly-squeezed juice in your facilities.

However, if you would like to obtain further in-depth details, please do not hesitate to contact any member of our **broad network of distributors and sales personnel**. They shall provide professional assistance to obtain the best results, select the juicer that best fits your needs or contact a good fruit distributor.

The **main advice** that can be given for the fruit juice business is as follows:

- Place your orange or multifruit juicer in **a highly visible** point of the facilities.
- **Advertise the service of freshly-squeezed juice** with all available communication tools: signs, menus, table displays, etc.
- Keep the units **clean** and with the best possible image. Use the fruit to **draw the attention** of the consumers.
- Use the versatility of our products to ensure a greater **variety of flavours**. Our juicers can transform oranges, lemons, pomegranates, medium-sized grapefruits, carrots, pineapples, apples, pears, water melons, melons and kiwis into juice.
- The juice RRP must be reasonable for the consumer while at the same time profitable for your business. If it is too high it will cause a drop in demand. Our network of sales personnel can advise you about the **optimum RRP**.

At the end of this catalogue you will find a complete description of our range of products and our recommendations for each type of business.

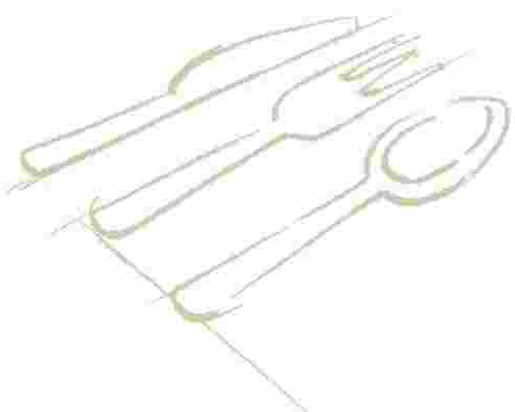

Zumex Minex

TRADITIONAL CATERING

Description: independently-owned bars, cafeterias and restaurants where consumers go to have breakfast, lunch or simply to have a snack.

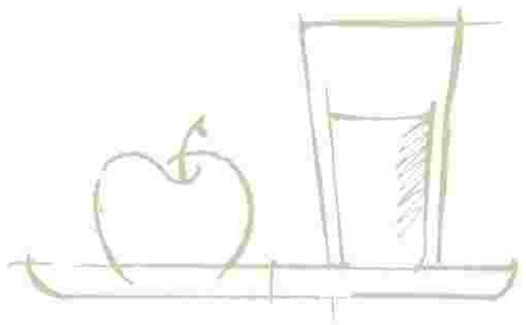

Important factors: available space, ease of service and cleanliness and including juice in the main instances of consumption.

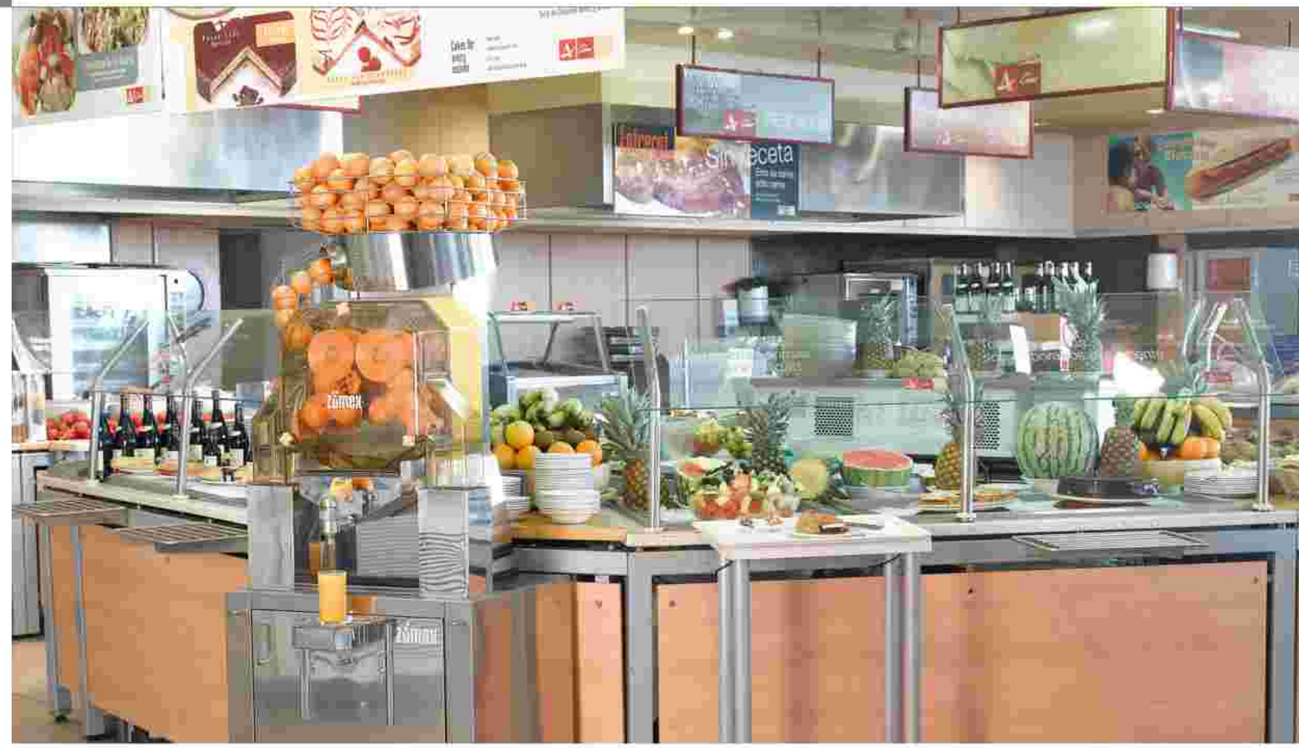

COMMERCIAL CATERING

Description: the brand gains relevance when quality food products are provided in areas with a lot of traffic such as airports, petrol stations or malls.

Important factors: swiftness and standardised operation, scope of the range and timetables and adequate visibility of the offer of juice.

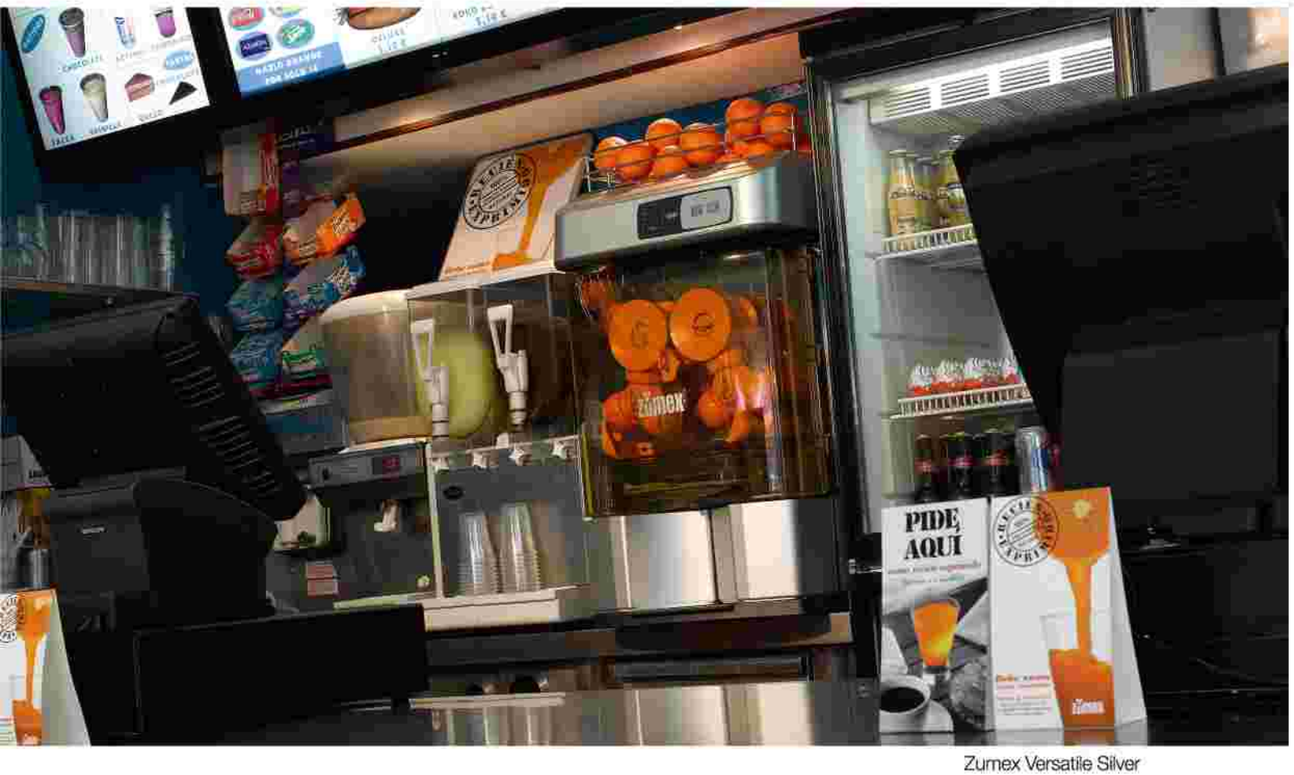

Zumex Speed Self-Service Podium

FAST FOOD RESTAURANTS

Description: the spot for consumers looking for a balance between quality, speed and variety, all within the best environment for the whole family and adapted to the lack of time available in modern days.

Important factors: complementing the range of products with healthier and more natural elements, in full view of the customers and compatible with the speed of service required, as well as with a competitive RRP.

Zumex Versatile Silver

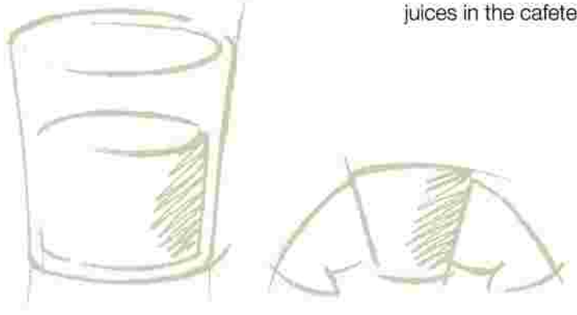

Zumex Speed Self-Service Podium

HOTELS

Description: tourism, either for leisure or for business, is undoubtedly one of the most dynamic sectors thanks to ever improving means of transport and accommodation. Consumers want to feel at home.

Important factors: improving breakfasts by including freshly-squeezed fruit juice prepared in front of the consumer, by providing self-service facilities and appliances adapted to the restrictions of a buffet, as well as the possibility of providing juices in the cafeteria or in room service.

JUICE BARS AND HEALTHY FOOD

Description: a sector on the rise, spots which consumers select specifically for the freshness and quality of freshly-squeezed fruit.

Important factors: the variety and combination of flavours and textures is the key in these businesses. It is therefore necessary to have machines that ensure swiftness, versatility and ease of use and cleaning.

Zumex Multifruit

Zumex Mobile

Within the options for consumption outside home, the **availability of foodstuffs** in points where **consumers congregate** (large events, concerts, festivals, stadiums, circuits, etc) is progressively gaining a greater relevance.

In order to incorporate freshly-squeezed fruit juices to this offer, Zumex has created **Zumex Mobile, an eye-catching and practical** mobile point of sale that follows consumers wherever they may go.

In order to promote the consumption of freshly-squeezed fruit juice or to make mobile sales a profitable business we have the following **recommendations**:

- Install and operate Zumex Mobile in the points of **greatest flow** of people and wherever it is most visible.
- Make sure there are adequate **water and electricity connections**.
- **Complement the offer of juice** with other products with high turnover that generate a greater level of traffic towards the point of sale (water, snacks, sweets).
- **Advertise** the service of freshly-squeezed juice.
- Keep the units **clean** and with the best possible image. Use the fruit to **draw the attention** of the consumers.
- The juice RRP must be reasonable for the consumer while at the same time profitable for your business. If it is too high it will cause a drop in demand. Our network of sales personnel can advise you about the **optimum RRP**.

Zumex Retail

Zumex provides **solutions for retail** businesses and thus also offers freshly-squeezed juice to consumers that want to **enjoy it at home** and do not have enough time or adequate appliances.

The **placing of our juicers or multifruit juicers** and of a series of **complements** designed specifically for these facilities mean that the operation and offer of freshly-squeezed juice no longer presents a problem.

Zumex Orange Corner was created as a modular point of sale to better respond to the needs of these businesses. Its size and accessories can be adapted to different facilities and it thus serves to create a further attraction around health and freshness. It is a new product that our network of distributors can provide further information on.

RECOMMENDATIONS FOR YOUR BUSINESS

Below is a **basic guide of the best practices** to maximise the consumption and profit of freshly-squeezed juice in your facilities.

However, if you would like to obtain further in-depth details, please do not hesitate to contact any member of our **broad network of distributors and sales personnel**. They shall provide professional assistance to obtain the best results, select the juicer that best fits your needs or indicate what complementary units are best suited for your point of sale.

The **main advice** that can be given for the fruit juice business is the following:

- Place your juicer or blender in a **highly visible** point of the facilities. In order to further **attract attention, use the Zumex Orange Corner,** whose modularity allows it to adapt to any available space.
- **Advertise the service of freshly-squeezed juice** with all available communication tools: signs, table displays, brochures, etc.
- If there is enough space in the point of sale, **a fridge or a bottle display with ice** should be included to keep the juice fresh at all times. Zumex also has complementary products to meet these needs.
- Keep the units **clean** and with the best possible image. Use the fruit to **draw the attention** of the consumers.
- Use the versatility of our products to ensure a greater **variety of flavours**. Our juicers and blenders can transform oranges, lemons, pomegranates, medium-sized grapefruits, carrots, pineapples, apples, pears, water melons, melons and kiwis into juice.
- The juice RRP must be reasonable for the consumer while at the same time profitable for your business. If it is too high it will cause a drop in demand. Our network of sales personnel can advise you about the **optimum RRP**.

At the end of this catalogue you will find a complete description of our range of products and our recommendations for each type of installation.

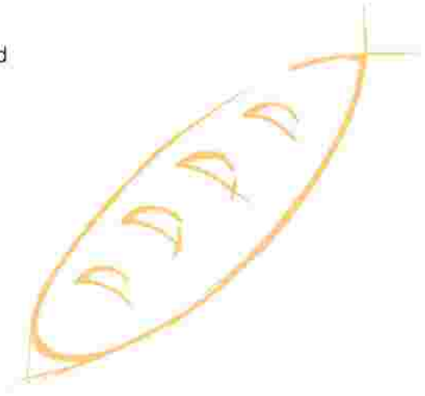

Zumex Versatile Podium

TRADITIONAL AND CONVENIENCE STORES

Description: all those businesses that offer take-away foodstuffs, mostly with independent ownership and that are considered proximity stores or have long opening times (fruit shops, convenience stores, food stores)

Important factors: use of space, the availability of juice to either take away or drink in the shop and the possibility of incorporating elements that make the offer of freshly-squeezed fruit juice stand out.

SUPERMARKETS

Description: proximity stores of various sizes that offer a wide range of food and drugstore products, normally under a well-known brand.

Important factors: availability of more space, with an area devoted especially to fruit. The ease of handling, possibility of decoration and mobility of the Zumex solution is the key.

Zumex Speed Tank Podium

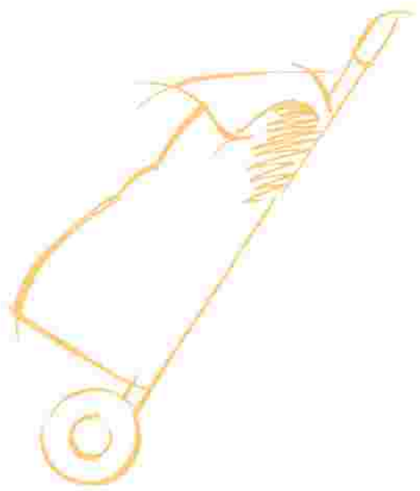

Zumex Orange Corner

HYPERMARKETS

Description: large businesses, with a wide range of products and normally with complementary spaces and services.

Important factors: the large spaces turn the point of sale of freshly-squeezed fruit juice into an asset for the business. Therefore, the correct decoration and the placing of the appropriate complements gain a greater relevance.

Zumex Vending

In many places there is no access to the point of sale with direct service. However, consumers still look for the same things: access to **consumption of food with the highest guarantee of being fresh and natural**.

It is within this context that the **system of automatic sale or vending** gains its importance. Zumex also has a solution for freshly-squeezed juice: a **new unit, with cooling, that eases operation** and functionality, while at the same time improving the profitability of this business model.

RECOMMENDATIONS FOR YOUR BUSINESS

In order to start a profitable and successful business based on the vending of freshly-squeezed fruit juice it is essential to follow the **recommendations set out below**:

- Our unit is designed to operate in **closed spaces**. It should not be placed outdoors.
- Since it is a single-product offer, it is important to ensure that the **flow of consumers** to the store is **high** during the hours of greatest consumption of juice, mainly breakfast and tea.
- Since the business involves perishable goods, **constant and careful attention** to the unit is a must so as to guarantee the best quality fruit juice. It must be borne in mind that the **fitted windows allow direct vision of the raw materials and of the squeezing system**.
- The **most recommendable points of sale** are those inside malls with a large flow of people, large factories and offices, large hospitals and clinics.
- The RRP must be reasonable for the consumer while at the same time profitable for your business. If it is too high it will cause a drop in demand. Our network of sales personnel can advise you about the **optimum RRP**.

Any questions?

JUICERS

How many oranges are necessary to obtain a natural fruit juice?
There is not an exact figure because the amount of juice depends on several factors (type of orange, size, time of year, etc), but in general a juice of between 200-225 ml can be obtained with three/four oranges.

What kind of fruits can be squeezed?
They can be used for any kind of citrus fruit (grapefruit, lemon, tangerine) or even other round fruits such as the pomegranate, as long as they meet the following two conditions: being as round as possible and having the recommended size.

What size fruit can the juicers take?
Your normal fruit supplier can provide you with oranges of sizes 6, 7 and 8 (diameters between 65 and 80 mm). These are the most common sizes for oranges 'for juice' and are available in the market all year round. There is also an accessory for fruits with a diameter smaller than 65 mm (kit65) that can be used to squeeze smaller fruits such as tangerines or lemons.

Are Zumex products safe and good quality?
Zumex products offer maximum quality and safety, fulfilling the most demanding certifications worldwide (CE, NSF, ETL), our management systems are ISO 9001:2000 certified, too.

MULTIFRUIT JUICERS

What are the most common juices that can be prepared with Zumex Multifruit?
Any type of fruit or vegetable (1) can be blended to obtain natural juices that can be consumed by themselves, combined or as a complement for more complex recipes.
The most common juices are **carrot, apple and pear**, but **melons, water melons, pineapples and peaches** (1) are also popular. However, consumption of the various types of juices is strongly conditioned by the time of year and, above all, by the cultural habits of the country.

Does the fruit need to be sliced before it is juiced?
The width of the feeder of Zumex Multifruit makes work easier because a whole apple or several carrots, for example, can be inserted without slicing them. Only fruits with a diameter greater than 86 mm have to be sliced.

Does the fruit need to be peeled before it is juiced?
The whole fruit can be blended without peeling it if the rind is edible. Fruits with non-edible rinds, such as kiwis, pineapples or water melons, do have to be peeled. If the fruit has a stone, it will have to be removed.

(1) Citrus fruits should not be blended. Their juice is much better in Zumex juicers because Zumex squeezing process avoids essential oils to contact the juice. Fruits with a large amount of fibre or a low percentage of juice (such as avocados or bananas) should not be squeezed.

Zumex Vending

VENDING

Does Zumex Vending produce freshly-squeezed juice?
Yes, the squeezer inside Zumex Vending starts to operate when the client asks for a juice and only squeezes the amount needed for a single glass.

What maintenance does Zumex Vending require?
Zumex Vending has a programmable self-cleaning system. However, every day or two the unit should be cleaned, the raw material reloaded and the bags for the rinds changed.

What prior installation does Zumex Vending require?
The ideal location for Zumex Vending should have an electrical connection, a water inlet and a drain. However, thanks to the independent kit accessory, the unit does not require a water connection or a drain because it shall be fitted with a water pump and a 10 litre water tank for cleaning.
